Registration

Workshop 1: How does the mind discover useful abstractions?

Workshop 2: Putting interaction center-stage for the study of knowledge structures and processes

Workshop 3: Advancing cognitive science and AI with cognitive-AI benchmarking

Workshop 4: Towards broader adoption of massive online experiments

Workshop 5: Large language models meet cognitive science

Workshop 6: Video games as a path to a contextualized cognitive science, or how to play 20 questions with nature and win
